

Silicon Technology at Apple

Join us for a Tech Talk with Sri Santhanam, Vice President of Silicon Engineering. Sri oversees the design and manufacturing of processor chips for Apple's mobile product family. By using internal designs, Apple can deliver processors optimized to work with iOS and deliver the highest performance and power efficiency.

When

Wednesday, September 13

6:30pm - 7:45pm

Where

Sibley Auditorium, Bechtel Engineering Center

Please RSVP [here](#)

Feel free to bring a copy of your resume.
