

# Make your mark in the restoration of local wetlands!

Saturday, 17 February

Join Berkeley's  
Society for Conservation Biology  
for a morning of volunteering  
with Save the Bay!

Plant native seedlings and enjoy a picnic lunch among the birds of MLK Shoreline!

We will meet on campus at 8.15, and return by 1.15pm.

Help local non-profit Save the Bay meet their goal of planting 35,000 seedlings to preserve and restore habitat for species of conservation concern like the Ridgway's rail and salt marsh harvest mouse!

**RSVP by 12 Feb at
